Subject: Dimock Residential GW Site Preliminary Results

Preliminary results for the Dimock Residential GW Site are included in the attachment. Included are results on the priority constituents from all labs, where available.

Updates:

Added additional results on pages 7 - 9.
Coliform added on pages 3 & 4; none above trigger levels.
Methane added on pages 5 & 6; none above trigger levels.

Results at or above trigger levels (updated since 2/13/12):

Arsenic: Several samples have arsenic results above trigger levels - **HW47 and HW47-P are significantly above trigger levels** (HW15a, HW47, HW47-P).

Sodium: Several samples have sodium results above trigger levels (HW15a-P, HW31-P, HW31, HW31z, HW47, HW47-P).

Manganese: One sample has a manganese result above trigger level (HW47).

We are expediting the review process for this set of samples.

Report Files:

A separate email will follow with final reports that have been placed on the R03FTPUser site in directory EPA Laboratory.

Please contact me at 410/305-2732, or Robin Costas 410/305-2659, if you experience delivery problems with this report. A copy of this e-mail will be retained in the case file.
